

Gluefast

Adhesives & Applying Equipment

The Captain B Electric Label Gluer

Economical, efficient and reliable. The versatile **Captain B** is the cost-effective way to get consistently good labeling results with cold-water-based adhesives. It applies adhesive to un gummed labels, operates simply and safely, with no exposed gears, and processes a large quantity of labels between each refilling. Excellent glue control with low-maintenance operation make it particularly economical, and durable construction makes it extremely reliable, even with the most strenuous applications. It comes standard with a 115-volt motor, but an optional air-powered motor is available for use in hazardous areas and where

electricity is unavailable. The Captain B with air motor is completely self-contained and includes air filter, oiler, noise suppressor, air gauge and speed control regulator.

Standard features:

- Available in 8", 10" and 14" roller widths
- Direct drive fully enclosed gear motor
- Removable glue reservoir
- Electronic motor-speed control for 115-volt motor

Optional features:

- 230-volt motor
- Explosion-proof air motor
- Pressure-bar attachment for rigid/thick stock such as chipboard, stuffed envelopes, etc.

MODEL	MAXIMUM LABEL WIDTH		ROLLER SPEED ¹ ft./min.	FEED-TABLE DIMENSIONS depth x width	NET WEIGHT lbs.	GLUE CAPACITY		BENCH SPACE REQUIREMENT
	inches	mm				liquid oz.	ml	
8"	7.5"	191	69-163	5.75" x 11.75"	21	36	1060	8.5" x 12"
10"	9.5"	242	69-163	5.75" x 13.75"	22	52	1530	8.5" x 14"
14"	13.5"	343	69-163	5.75" x 17.75"	28.5	68	2010	8.5" x 18"

¹Figures shown applicable with motor-speed control. Without control, roller runs 163/minute only.
